Professional Summary

Front-End Developer (Angular/React, Ionic) with ~2 years experience building fast, accessible web and hybrid mobile apps. Skilled in **TypeScript**, real-time features using **WebSockets**, and **CI/CD** automation. Improved Core Web Vitals and Lighthouse scores, delivering scalable features via **AWS Serverless** and GitLab pipelines.

Experience

Software Developer, 7 Dots Smart Solutions— Hyderabad, India Dec 2024 – Present

- Led the **EventReply** UI revamp: Lighthouse ~20%→**80%** and **2.5x** faster loads by focusing on **Core Web Vitals**, code-splitting, lazy loading, caching, and **WCAG**-aware fixes.
- Built and maintained **Angular/Ionic** apps for **10K+** users with **99%** crash-free sessions; delivered real-time chat via **WebSockets** on **AWS Lambda**; optimized admin panels (-45% median load).
- Set up **GitLab CI/CD** for Android & iOS (manual deploy time **-40%**); integrated **Sentry** release health & alerting (**-35%** unresolved production issues);
- Implemented a few **Spring Boot REST APIs** to support autocomplete and other utility features.

Front-End Developer Intern, 7 Dots Smart Solutions — Hyderabad, India Jun 2024 – Nov 2024

- Contributed to Angular/Ionic apps for early production releases; resolved **15+** high-priority Jira issues.
- Implemented secure login, buy/sell flows, and event creation modules; improved mobile layout stability by **30%**.

Projects

EchoWave Social Media Platform Live 🔗 | Code 🐙

- Real-time social networking app using the **MERN** stack; responsive UI with **Tailwind CSS**.
- Real-time chat via **Socket.io**; optimized assets to reduce page load by **40%**.

Frensy (Home-services & social networking) Link 🔗

- Built responsive UI with **Angular & Ionic**; Android production builds via **GitLab CI/CD**.
- Automated integration of **200K+** service listings using **scrape-it**; consumed REST APIs.

VVIT LearnSpace Live 🔗 | Code 🐙

- MERN platform enabling collaboration for VVIT students: roadmaps, code env, repos, notes, and papers.
- Leveraged MERN stack (MongoDB, Express.js, React.js, Node.js) for a full-stack app; deployed on Vercel for fast, reliable access.

Education

Vasireddy Venkatadri Institute of Technology (VVIT) — B.Tech, CSE (Guntur, AP) 2020 – 2024

Coursework: Data Structures and Algorithms, DBMS, OOP, Operating Systems, Computer Networks

Key Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS

Front-End: Angular, React.js, Next.js 13+ (App Router, RSC, SSR/SSG), Ionic

State & Data: NgRx, Redux Toolkit, React Hooks/Context, React Query / TanStack Query, RxJS

UI/UX: Tailwind CSS, Material UI, Figma collaboration, Responsive Grid Design, Accessibility (WCAG 2.1)

Backend & APIs: Spring Boot, Node.js, Express.js, REST, GraphQL (integration)

Testing & Quality: Jest, Cypress/Playwright (E2E), ESLint, Prettier, Husky (pre-commit)

Cloud & DevOps: AWS (Lambda, Amplify, S3, CloudFront), Docker (basics), Vercel, Netlify, GitLab CI/CD

Performance: Core Web Vitals Optimization, Lighthouse Audits, Code Splitting, Lazy Loading, Bundle Optimization

Bonus: WebSockets, WebRTC (basics), PWA, AI API Integrations (OpenAI/Gemini)

Achievements

TECHMARATHON — 1st Prize, 24-hour national-level hackathon at V R Siddhartha Engineering College.
