SUMMARY

Full-Stack Mobile & Front-End Developer specialising in **Flutter**, **Angular**, and **React**, with ∼2 years of experience shipping production apps to 10K+ users. Skilled in real-time features (WebSockets, BLE), cloud-native pipelines (AWS Lambda/SQS/S3), and CI/CD automation. Consistent track record of measurable gains — BLE latency down 40%, Lighthouse scores up from 20% to 80%, report generation 60% faster.

EXPERIENCE

NeuroStellar Jan. 2026 – Present
Junior Software Engineer Chennai, India

- Built a **Flutter** health-tracking mobile app from scratch integrating **Google Health Connect** & **Apple Health** via `flutter_health`; **WorkManager** background sync to local **Isar DB** and **Firebase** cloud reduced data-loss by ∼**90%** and average sync latency to <**2 s**
- Designed an **AWS serverless report-generation pipeline** (S3 trigger → SQS → Lambda) with a **Dockerised** Python service; cut end-to-end generation time by ∼**60%**; added **CloudWatch** live-tracking dashboard, alarms, and **SNS** notifications, reducing mean time-to-detect errors by ∼**50%**
- Revamped the **Flutter Desktop** admin console and built internal developer tooling, reducing task-completion time by ∼**35%**
- Rearchitected **BLE** connection logic using Flutter isolates & foreground services; **connection time down** ∼**40%**, BLE-related crash reports down ∼**30%**

7 Dots Smart Solutions Dec. 2024 – Dec. 2025
Software Developer Hyderabad, India

- Led **EventReply** UI revamp — Lighthouse score **20%** → **80%** and **2.5**× **faster** page loads via Core Web Vitals optimisation, code-splitting, lazy loading, caching, and **WCAG** accessibility fixes
- Built and maintained **Angular / Ionic** apps for **10K+ users** with **99% crash-free sessions**; real-time chat via **WebSockets** on **AWS Lambda**; admin panel median load time reduced by **45%**
- Configured **GitLab CI/CD** for Android & iOS (**manual deploy time** −**40%**); integrated **Sentry** release health & alerting (**unresolved production issues** −**35%**)
- Implemented **Spring Boot REST APIs** for autocomplete and utility features

7 Dots Smart Solutions Jun. 2024 – Nov. 2024
Front-End Developer Intern Hyderabad, India

- Contributed to Angular/Ionic apps across early production releases; resolved **15+ high-priority Jira issues**
- Delivered secure login, buy/sell, and event-creation modules; improved mobile layout stability by **30%**

PROJECTS

EchoWave | *MERN, Socket.io, Tailwind CSS* | Live GitHub

- Built a full-stack real-time social platform with **JWT-based auth**, a dynamic feed system, and live messaging using **Socket.io** for real-time chat and user presence updates
- Designed scalable **REST APIs** with **Node.js & Express**; modelled data in **MongoDB** to support posts, follows, and messaging at scale
- Deployed on **Render** with optimised asset management reduced page load time by **40%**

Frensy | *Angular, Ionic, Node.js, GitLab CI/CD* | Live

- Contributed to a hybrid **home-services & social networking** app using **Angular & Ionic**; built responsive UI screens and integrated **REST APIs** for posts, groups, and service listings
- Automated scraping and ingestion of **200K+ service listings** using **Node.js** (`scrape-it`), significantly reducing manual data entry overhead

- Configured **GitLab CI/CD** pipeline for automated Android production builds and deployment steps

VVIT LearnSpace | *MERN, Tailwind CSS, Vercel* | Live GitHub

- Built a **student collaboration platform** for VVIT on the **MERN** stack unified system for roadmaps, coding practice, notes, repositories, and academic papers
- Designed the frontend with **React & Tailwind CSS**; built backend with **Node.js & MongoDB** supporting resource sharing and structured academic documentation
- Deployed on **Vercel** with optimised build pipeline; enabled seamless access for students across departments

EDUCATION

Vasireddy Venkatadri Institute of Technology (VVIT) Aug. 2020 – May 2024
B.Tech, Computer Science & Engineering Guntur, AP

- **Coursework**: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Networks
- **Achievement**: TECHMARATHON — 1st Prize, 24-hour national-level hackathon at V R Siddhartha Engineering College

SKILLS

Languages : JavaScript (ES6+), TypeScript, Dart, HTML5, CSS3/SCSS
Mobile : Flutter, Ionic, flutter_health, WorkManager, BLE (flutter_blue_plus), Isar DB, Firebase Auth/Firestore, Foreground Services
Front-End : Angular, React.js, Next.js 13+ (App Router, RSC, SSR/SSG), NgRx, Redux Toolkit, RxJS, React Query
Backend & APIs : Node.js, Express.js, Spring Boot, REST, GraphQL (integration)
Cloud & DevOps : AWS (Lambda, SQS, S3, CloudFront, Amplify), Docker, GitLab CI/CD, Firebase, Vercel, Netlify
Observability : CloudWatch (dashboards, alarms), SNS, Sentry
Testing & Quality : Jest, Cypress/Playwright (E2E), ESLint, Prettier, Husky
UI & Performance : Tailwind CSS, Material UI, WCAG 2.1, Core Web Vitals, Lighthouse, Code Splitting, Lazy Loading
Bonus : WebSockets, WebRTC (basics), PWA, AI API integrations (OpenAI/Gemini)
